Special Occasion Ready

Let us help you plan for your special event. Everyone always wants to put his or her best face forward on that special day. Whether it's your wedding, your son or daughter's wedding, a reunion or a special vacation, creating a specialized plan for achieving your goal is helpful.

For new or established patients, it is helpful to create an individualized treatment plan (ITP) with the goal date in mind so that you are "healed" and ready to go for that special time.

Getting your skin in tiptop shape is achievable when combining the best treatments. We can incorporate a special combination of chemical peels and DermaPen® treatments that would blend with a skin care regimen that works for your skin and your lifestyle. Treatments such as Botox® Cosmetic and Fillers are staples in these plans as they give an instantaneous boost that enhances your overall look. Laser procedures such as Intense Pulsed Light (IPL) are great for making the skin tone more even.

Surgical procedures such as upper Eyelid Surgery, Facelift and Rhinoplasty are timed so that the recovery will happen in time for your event. Give us your timeline and we will give you our plan to enhance your natural beauty, call 270.2003.

Special Occasion Timeline:

6 months or more before your event

- Surgery: whether it is Eyelid Surgery, a Facelift or Rhinoplasty, the longer you have to recover after surgery the better.

3 months or more before your event

- Start your skin care regimen, which includes a combination of DermaPen® treatments, Chemical Peels and at-home skin care regimen. You can get 3 treatments during this time.

2 months or more before your event

- Intense Pulsed Light Treatment (IPL): great for aging hands, sun spots on face, or chest freckling. Treatments can be done every 2-4 weeks
 - Volumizer such as Juvederm® Voluma; it takes 6 weeks to see final results.
- Get 1 DermaPen® treatment; follow up 1 month later with a Chemical Peel. Continue skin care use.

1 month or more before your event

- Muscle Relaxer such as Botox® Cosmetic: It takes two weeks to see the full effect
 - 1 DermaPen® treatment: do this at the beginning of the month.
- Event Chemical Peel: do this about 2 days before your event, as there is no downtime
